## PROJECTS

### CREATE A STORY – FULL STACK WEBSITE

[Live site](#) | [Github](#) > [Client](#) | [Server](#)

#### A website to enroll into various photography classes

- Implemented firebase authentication to store user informations and included google login
- Integrated SSLCOMREZ payment gateway to complete the payment of the selected classes
- Developed admin/student/instructor specific dashboard using axios and jsonwebtoken

**Technologies:** MongoDB, Firebase, React.js, Tailwind CSS, Express.js, Axios, Tanstack Query, JWT

### MY HEROES – FULL STACK WEBSITE

[Live site](#) | [Github](#) > [Client](#) | [Server](#)

#### An e-commerce site of action heroes

- Registered user can add a toy to the list and also edit or delete toy information
- Created indexing on the backend to find toy by name and also implemented sorting based on the price
- Customize the website design using tailwind css and integrated animation using aos package

**Technologies:** Express.js, React.js, MongoDB, Firebase, Tailwind CSS, DaisyUI

### INDIAN CUISINE – FRONT END WEBSITE

[Live site](#) | [Github](#) > [Client](#)

#### A site to discover indian cooking riches

- Designed a sleek website using react.js, tailwind css from scratch and implemented dark mode
- Showcasing authentic Indian recipes and celebrated chefs with react and firebase authentication
- Developed routes using react-router, created active link with NavLink and used private routes

**Technologies:** React.js, Firebase, Tailwind CSS, React Leaflet, React Lazy Load, DaisyUI
